

The Outpatient Spinal Cord Independence Measure (SCIM) Data Analysis

**The SCIM is a disability scale developed (Catz et al. 1997) that specifically addresses outpatients with spinal cord lesions (SCL) in order to describe their ability to accomplish activities of daily living.*

	2014	2015	2016
<i>Self-Care</i>	1.5	1.0	2.4
<i>Respiration and Sphincter management</i>	1.7	0	0
<i>Mobility</i>	3.0	3.6	4.5
<i>Total SCIM</i>	6.1	6.0	6.8
<i>Quality of life</i>	3.8	2.3	1.9
