THERAPY IN THE HOME

Home Therapy is a great way to build up strength, mobility and endurance after an accident, illness or surgery. Bacharach's expert physical therapists will craft a personalized plan of care designed to address your specific needs to get you back to independence and enjoying the activities you like best.

Bacharach Therapy in the Home is recommended for those who need physical or occupational therapy but are restricted from accessing community services due to difficulty walking, weakness or if unable to drive. It is helpful for anyone de-conditioned after a hospital stay or a lengthy illness. Home Therapy not only improves mobility and function, it helps people return to the community, whether for outpatient therapy or to return to a full and active lifestyle.

Home Therapy is just one more way that Bacharach brings its excellence, reputation and experience to our community. You trust Bacharach – and you can trust us at your home, as well. Our therapists treat patients with:

- Fractures
- Stroke
- Post-joint replacement (daily therapy available)
- De-conditioning or weakness after cardiac event
- Balance problems
- Post-surgical manipulation
- Orthopedic conditions
- Neurologic conditions

You will need:

A prescription for physical therapy from your doctor.

To schedule:

Call (609)652-7000

Our team will call within 24 hours to schedule a visit. We accept most insurance plans, including Medicare Part B.
