COMPREHENSIVE OUTPATIENT SERVICES

Bacharach’s pediatric rehabilitation service is focused on outpatient care, in the following areas of specialty:

• Concussion management
• Muscular Dystrophy
• Cerebral Palsy
• Status post amputation, prosthetic training
• Orthopedics
• Down Syndrome
• Seizure disorders
• Global development delay
• Feeding disturbances/picky eaters/problem feeders
• Autism spectrum disorders
• Traumatic and non-traumatic brain injury
• Prematurity
• Post stroke
• ADD/ADHD
• Hearing impairments
• Spina bifida
• Torticollis/Plagiocephaly
• Balance and motor planning dysfunction
• Coordination deficits
• Amplified Musculoskeletal Pain Syndrome

PHYSICAL THERAPY

Physical therapy for children is focused on gross motor skills. Using a custom plan of assessment and exercise, Bacharach’s physical therapists will utilize:

• Range of motion
• Strengthening, endurance, balance and coordination
• Functional mobility
• Gait/stair training
• Parent and family education
• Aquatic therapy
• Neuro-developmental play
• Developmental techniques
• Orthotics and prosthetics

OCCUPATIONAL THERAPY

The occupational therapy team specializes in basic activities of daily living, fine motor skills and other upper-body rehabilitation, including:

• Sensory integration – modulation and “sensory diets” as needed
• Neuro-developmental treatment techniques – to normalize posture and function
• Vision and perception training – with referrals to neuro-optometrist as needed
• Fine motor and play skills to support activities of daily living
• Parent and family education
• Self-help skills
• Feeding therapy

INTERDISCIPLINARY PLANNING

Bacharach’s team of specialists includes physical therapy, occupational therapy, audiology and speech-language therapy.

SPEECH-LANGUAGE THERAPY

Speech-language therapy is critical to a child’s ability to communicate, which has significant impact on social and educational well-being. We offer a variety of treatments and evaluations including:

• Apraxia therapy
• Oral motor therapy
• Articulation and phonological therapy
• Language therapy
• Picture Exchange Communication System
• Comprehensive swallowing evaluations and therapy
• Evaluation for use of augmentative/alternative communication systems
• Parent and family education

AUDIOLOGY (609) 748-5370

Bacharach’s audiologists have special training in evaluation and treatment of pediatric hearing disorders.

Services include:

• Comprehensive evaluation for newborns and older children
• Auditory and brainstem-evoked response testing
• Otoacoustic emissions testing
• Auditory processing evaluations
• Pediatric hearing aid consultation and fitting
• Parent and family education
